

Title: **BSR 3.0 -- Governance-Management Connection**

Code: 3.0

Section: 3. BSRs -- Board-Superintendent Relationship

The Board of Education's main connection to the operational organization is the Superintendent. The Board of Education will direct the operational organization only through the Superintendent, in his/her function as the Chief Executive Officer. However, the Board President, at any business meeting, may request that specific policies in the custody of the Superintendent (administrative policies) be presented for review at the next study session. Any new policy language supported by a majority of the Board at such a study session will be presented for Board adoption at the next meeting of the Board. At the Superintendent's discretion, other staff members may be designated as points of contact.
