

Title: Student Use of the Internet, Electronic Communications, and Digital Media Agreement

Code: JS E 1

Section: Section J: Students

As the parent, guardian, or legal custodian of a student enrolled in Academy District 20, I acknowledge having reviewed the District's policy concerning Student Use of the Internet, Electronic Communications, and Digital Media. I understand that the purpose of the Internet, electronic communications, and digital media access is for educational use only, and the District has implemented measures to block or filter material and information that could be considered obscene, pornographic, or otherwise harmful to minors.

While recognizing the efforts made by the District in this regard, I am aware of the inherent limitations in preventing access to all potentially objectionable material. Therefore, I agree not to hold the District accountable for any such materials or information that my child may encounter while using district-provided technology devices. Additionally, I accept full responsibility for supervising my child's Internet and electronic communications usage outside of the school premises.

I waive any claims against the school district for costs, damages, or losses arising from my child's use of district technology devices, including Internet and electronic communications, and any associated fees or charges incurred.

Furthermore, I understand that Academy District 20 respects the rights of each family to determine whether their student may access the Internet, subject to filtering as required by the Children's Internet Protection Act (CIPA) or only utilize the District's education systems. By default, students are granted access to the Internet and Electronic Communications unless otherwise specified. Parents, guardians, or legal custodians can restrict access at any time by accessing the Infinite Campus Extended Portal and adjusting the Internet Access settings to limit access accordingly.
